How To Get Started With MUAMA Ryoko?

Step 1

Insert the pre-paid SIM card provided in the package into your Ryoko 4G device;

The provided SIM card comes in 3 different sizes: standard, micro & nano. **Use the standard size!**
Step 2

Turn on the Ryoko 4G hotspot by using the power button (press and hold);

Step 3

Connect Ryoko 4G hotspot to your smartphone or other device EITHER BY:

1. pressing WPS button twice and scanning a QR code which appears on Ryoko screen with your smartphone OR:

2. connecting your smartphone or other device to the now visible “Ryoko” network. It will have the same name as SSID visible on your Ryoko screen. The password is marked as “key” on your MUAMA Ryoko screen (to see SSID and the password press the WPS button once).

Step 4

We strongly recommend that you change the default SSID and Wi-Fi key to keep your data secure. You can do that by using the Web Management system.

IMPORTANT - if you continue to see a “No Service” message on Ryoko 4G Hotspot screen after connecting it to your device for the first time, it means the card has no data. Please, contact our customer support team to fix the issue.
Logging into the Web Management page

Step 1

Make sure that the connection between the 4G Hotspot and the device used to access the Internet is working normally.

Please note:
You will not be able to access Web Management if not connected to the Ryoko 4G Hotspot!

Step 2

Open the browser on your device and enter http://192.168.0.1 in the address box.

Step 3

Enter your username and password (default: admin) to log into the web management page. If you have any difficulties, please contact the customer support team.

While in Web Management page you can:

- Check your data usage, connection speed, network settings & connected devices.
- Change SSID & password;
- Change your connection mode;
- Restore Ryoko 4G Hotspot factory settings.

ENJOY YOUR INTERNET CONNECTION!
